1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 6-9 are rejected under 35 U.S.C. 101 because the claims are non-statutory as not being **tangibly embodied** in a manner so as to be executable.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

4. Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Beard et al, US. Pat. No. 5,991,830 (cited by Applicant).

(b) sending a first focus command by the host to a first one of the devices connected to the communication bus as a focused device [*READ_DEVICE_TYPE* command, col. 8, lines 37-39, col. 11, line 4-9];

(c) in response to a probe command sent by the host to the focused device, returning configuration information by the focused device [col. 8, lines 39-45, col. 11, lines 9-14]; and

(d) branding the focused device by the host based upon the confirmation information [col. 8, lines 58-63, col. 11, lines 15-22].

6. Claims 2, 7, 10, Beard teaches (e) sending a blur command by the host to the branded device [col. 11, lines 44-47]; (f) converting the blur command to second focus command by the branded device [*Q-PORT* device informs the host of the existence of a second device. The host issues a *READ_DEVICE_TYPE* command, see the discussion started at col. Line 55]; (g) passing the second focus command to a second one of the devices connected to the communication bus as the focused device by the first branded device [col. 12, lines 1-12]; (h) in response to a second probe command sent by the host to the focused device, returning configuration information by the focused device [col. 12, lines 13-35]; and (i) branding the focused device by the host based upon the configuration information [col. 12, lines 13-35].
